Aluminum Signs With Super Bright Solar Powered LED Lights

Stop Sign

Crossing Sign

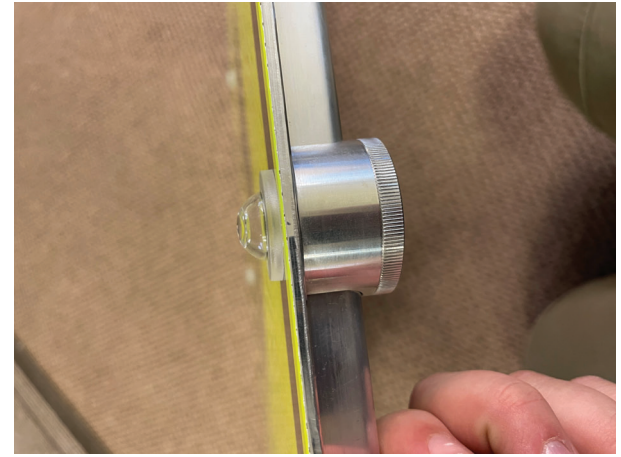

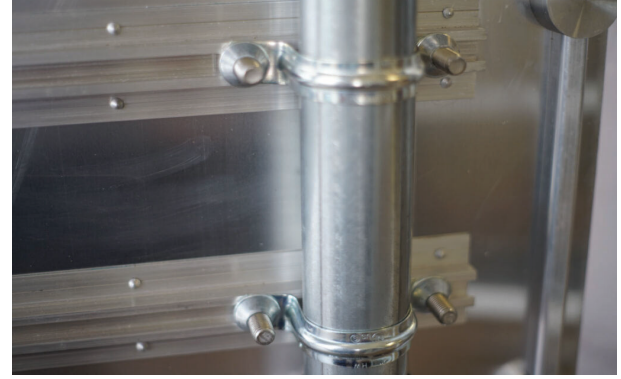

Meets MUTCD Standards

Make crosswalks safer, reduce accidents, and save lives!

- › Solar powered, no AC power required, can be connected to AC with DC Converter
- › Double layer aluminum and plastic sign panel with 3M DG³ reflective sheeting
 - Anti-graffiti protective overlay
 - Stainless steel fasteners
- › 1. Auto-Dim mode adjusts to surrounding brightness (lowers light output at night), saves energy
- › Visible over 0.9 miles (1000 m), 8 super bright LEDs per sign
 - Flash rate of 41 times per minute, LEDs flash simultaneously
- › Fully adjustable solar panel, lock in position at maximum sun angle
- › Tamper proof, wiring is built into sign and batteries hidden in pole
- › 100% waterproof
- › Easy to install on any 2" - 3" (5 -7.6 cm) round or square sign post
- › Three year manufacturer warranty

Product Specifications

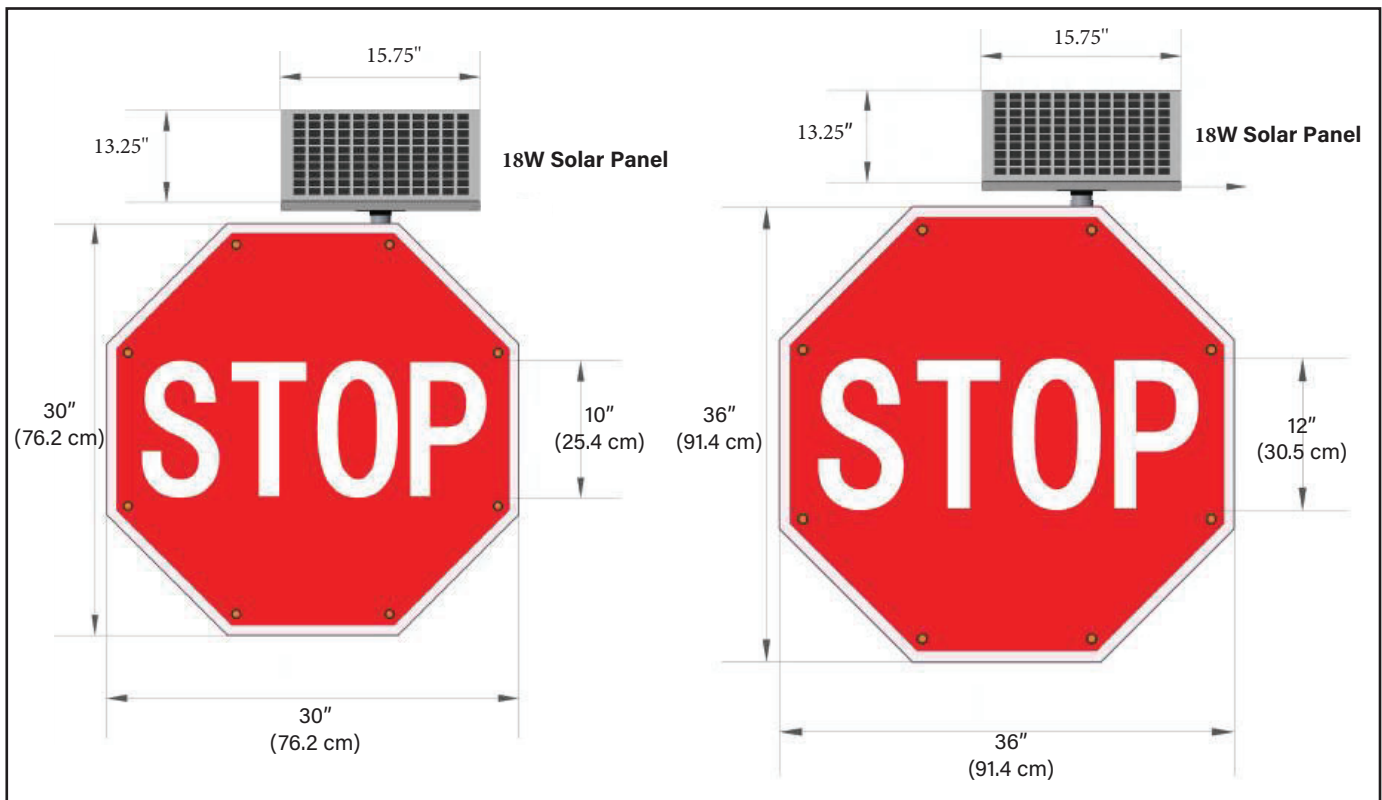

Sign size - 30" x 30"
Weight - 25 lbs
Thickness - .160" blank
Visibility - .9 miles
LED Flash rate - 41 times per minute
Solar panel - 15.75"x 13.25" 20.5v 18w
Battery type - INR 18650- 3SP1 12800Mah 12V 153Wh
Working temp - -20 to 140 Degrees
Material - Rolled aluminum
Vandal Resistant - Yes
Warranty - 3 years
Includes - Tamper-proof for Solar Panel Installation

LED TRAFFIC SIGNS

Stop Sign Specifications

- ▶ MUTCD Code: R1-1
- ▶ LED's: 8, Red
- ▶ Sign Color: 3M™ DG3 red and white
- ▶ All mounting hardware included to fit round, square, or u-shaped post
- ▶ Visibility: over 0.9 miles (1000 m)
- ▶ LED Life Expectancy: over 10 years
- ▶ Solar Panel: DC 20.5v 18w monocrystal solar module
- ▶ Battery Type: 12V 9AH battery pack
- ▶ Full charge operation: 120hours
- ▶ Working Temperature: -20°F - 140°F (-20°C to 60°C)
